## **Sea Fox**

Due to Clan Sea Foxes practice of rarely fighting in anything other than the units they sell to other nations, we don't know what they produce outside of the weapons of war that they actively sell. This is the most complete product listing we have been able to compile. We do know they build *Sea Fox*-class frigates, but have never been able to track down where those are built.

Itabaiana – *Ammon AeroSpace* Fighter; *Griffin IIC*, *Locust IIC*, *Mad Cat MK II*, and *Shadow Hawk IIC* BattleMechs; *Union-C* DropShip

## **Lyran Commonwealth**

### **Alarion Association**

The Alarion Association is the second most powerful Princedom in the Lyran Commonwealth, with the ability to build WarShips, JumpShips, DropShips, AeroSpace fighters, BattleMechs, and vehicles that it sells to the other Princedoms for badly needed funds used for continuing to repair war damage. Rich, powerful, and the center of a massive bulk of Nashan Diversified power, the other Princedoms have so far balked at making them angry.

Alarion – Bowie Industries – *Chippewa* AeroSpace fighter; *Archer* BattleMech; *Hercules*, *Leopard*, *Leopard CV*, and *Union*-class DropShips  
– Ioto Galactic – *Invader*, *Monolith*, and *Scout* JumpShips; *Speer* Frigate, *Schild* Destroyer, and *Zerstörer* Cruiser

heavy tracked APC vehicles

Storfors – J.B. BattleMechs Incorporated – *BattleMaster*, *Chameleon*, and *Dragon Fire* BattleMechs

Vendrell – Mountain Wolf BattleMechs – *Night Hawk* BattleMech

Virtue – Nashan Cartographers Unlimited

### **Blackstone Authority**

The Blackstone Authority is one of the weakest Princedoms, situated on the border with Clan Jade Falcon, but it has used its heavy BattleMech production to keep them fighting fair ever since Coventry presence along the border collapsed. In the habit of purchasing other units from Coventry, Alarion, or Donegal as needed, it commands a respectable fleet and vehicle forces as well, but the bulk of its power comes from the BattleMechs it builds and uses nearly without exception. It is currently in a battle of survival against Nashan Diversified operatives attempting to take over Blackstone, which has dried up support from the other Princedoms.

Inarcs – Blackstone BattleMechs Limited – *Enfield*, *Ostscout*, *Talon*, and *Hauptmann* (omni) BattleMechs

### **Coventry Division**

The Coventry Division, long housing a major Nashan presence, currently sells many of their BattleMechs to Donegal and Alarion. Commanding the third-largest fleet in the Commonwealth, the Coventry Division is a force to be reckoned with. Other Princedoms consider it to be a figurehead of Nashan Diversified, though Coventry seems to still have some backbone. Many wonder how long that will remain true as the Nashan presence continues to grow.

Coventry – Coventry Metal Works – *Blitzkrieg*, *Black Hawk-KU* (omni), *Commando*, *Dart*, *Firestarter* (omni), *Hauptmann* (omni), *Hollander II*, *Hunchback*, *Phoenix Hawk*, *Scarabus*, *Stiletto*, *Stinger*, and *Vulcan* BattleMechs  
– Nashan Computers – Personal and commercial computers and software

Ludwigshafen – Nashan Information Services

### **Protectorate of Donegal**

The Protectorate of Donegal is the only remaining “normal” governmental institution in the Lyrans Commonwealth. While the Princedoms are commanded and owned by corporations, the Protectorate is still controlled by the civilian government, and the Archon of course, on Tharkad and Donegal. Commanding a fleet even larger than that run by Alarion, it has heavy BattleMech and vehicle reserves as well. It is also the base

of Nashan Diversified power in the Commonwealth, but so far at least Nashan has not made an attempt to take over like it has in the Princedoms.

- Tharkan Media Associates

Pherkad – Longanecker PlastiSteel – Also with headquarters on Crevedia

## **Princedom of Gienah**

The Princedom of Gienah is the weakest of the remaining Princedoms, caught on the borders of both the Federation of Skye and the Free Worlds League. With no internal BattleMech factories and being blacklisted by Nashan for actively fighting them in the corporate wars, most of their few BattleMechs come from the StarCorps Supremacy and are husbanded in battle. Most of their forces consist of mass numbers of high-speed vehicles used to swarm the enemy in hopes that they can pull them down with sheer numbers. Their navy is negligible and many wonder how long they will be able to maintain their independence from either Skye or the Free Worlds League. Only their relative lack of aggressiveness has kept Gienah from being swallowed by one of them over the years.

Hyde – Zettle Metals, Incorporated – Major office on Rahne in Solaris Cooperative

### **StarCorps Supremacy**

The StarCorps Supremacy is more powerful than Gienah, but nothing to write home about. They have fought and held a line against both the League and the Hegemony for many years though and continue to look like they can maintain it. Their BattleMech forces are well trained and some of the best troops in space. They also deploy vehicles purchased from Gienah, but like Gienah sport a fleet with little to recommend it. Also like Gienah, they are a major target of Nashan corporate raids and many of their planets are constant battlegrounds in the corporate wars.
